- iz roda v rod; vedenje skupnosti
- Grki razpravljanje
- izum pisave; prenos znanja v prostoru in času (jezik)
 - zapisi posamičnih vedenj in znanj: astronomska opažanja, postopki izračuna
 - povezovanje vedenj, logika, заметки disciplin – Evklid geometrija (Curry)
 - problem obstojnosti – več izvodov zapisa
 - problem razmnoževanja zapisov – prepisovanje
 - problem dostopnosti – knjižnice (Aleksandrija); заметки поšte
 - problem jezikov – prevajanje ali skupni jezik (grščina, latinščina, arabščina, angleščina)
- tekmovanja v reševanju kubične enačbe – Cardano (~1535); dopisovanje med znanstveniki (Pascal, Descartes, ...)

The Fertile Crescent and Greece

Repozitoriji

V. Batagelj

Digitalization

Repozitoriji

V. Batagelj

Prevod

Razvoj

Digitalization

Repositories

IT has had a profound impact on scientific publications

- digital works are straightforward to duplicate (copyright issues).
- software tools for creating texts (TeX, Word, etc.) allow the author to prepare the work for publication fully.
- works in digital format can exceed the capabilities of printing (multimedia, code, external links),
- sustainability problem.

Due to the rapid (exponential) growth in the number of new works, the current approach to publishing is becoming inadequate (growth in the number of journals, mega-journals, the problem of obtaining reviewers, etc.).

Expectations of the author-scientist

- instant publication and access,
- "registration" – timestamp,
- easy to find,
- unlimited access,
- permanent storage (longevity, permanence),
- readers' (community) response, recognition.

This can be achieved with repositories.

prepublishing → publishing

Virtual Software Library

Repozitoriji

V. Batagelj

Prevod

Razvoj

Digitalization

Repositories

In eighties FTP repositories (mainly software) **Simtel**, US, Finland.
Later C|Net, WinSite, Tucows, Stroud's CWSApps, **4shared**.
C|net was based on **Virtual Software Library** developed by **Žiga Turk**.
A meta-repository over several repositories (standardization).

Other resources for searching

If you're looking for freeware or shareware (and they're not the same -- you're supposed to pay for shareware), try the Virtual Software Library, which allows searching and retrieval of more than 130,000 files. The library was started by Professor Ziga Turk at the University of Ljubljana, Slovenia, but has recently moved to a new site at a company that calls itself c|net: the computer network (<http://vsl.cnet.com>). [02 Mar 1997: now called Shareware.Com, <http://www.shareware.com>.]

from EEI Communications, November 1995

Improved repositories

Repozitoriji

V. Batagelj

Prevod

Razvoj

Digitalization

Repositories

A possible answer is repositories that also support

- response from **registered** readers
 - stars
 - comments (+ response to them)
 - citation (implicit response)
 - tracing the use of work (implicit response)
- list of works citing the work
- powerful repository search (can) considers responses and the response author weights

This data can also be helpful in the evaluation of individual work.

Duplicated ID (submission in different repositories) problem.
